

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

How much money does our government need, and why to do you always persist on taking from people who are already at the breaking point. I use my cell phone for emergencies only and now you want me to pay as is I use my cell phone all the time, this seems very unfair. If you pass this bill I will lose my cell phone and my emergency contact with my family. If this happens it will show me exactly how much government democrat and republican feel about the average working person just trying to stay ahead in a system that is set up so the rich get richer and the poor and middle class stay on the bottom of heap bearing the burden of your big spending. Please STOP STOP STOP.

You, Government say you care about the working class, us middle income families, but I have yet to see any evidence of this. I am beging to believe I never will

Sincerely,

Jessica Rissew
